# Welcome

Planning a night program at the Dallas Zoo is fun. There are some things I need to do to prepare.

When I arrive, I will check in at the Main Entrance.

# Planning Your Adventure

It is important that I only bring what I can carry to help me have a good night.

I should bring a flashlight and water bottle. If I need other things like medicine or insect repellent, I will bring those as well.

# What to Expect

After I check in, we will get started for our tour. I can go at my own pace and explore only the areas where I am allowed to go.

# Exploring the Dallas Zoo at Night

The Dallas Zoo is very big, so I will be prepared for a lot of walking.

It may also be very dark, so it will be important that I stay with my family at all times.

# Animal Encounters

If I don't get to see any animals on the tour, that is ok.

I will get a special, up-close animal encounter led by an instructor.

I may even be able to touch these animals if the instructor says it is ok. I will wait until they tell us to do so.

# Restrooms

I may have to walk to some restrooms. I may have to wait to take a turn to share the restrooms with others in the night tour experience.

If it is an emergency, I will ask zoo staff if there is another restroom nearby.

It is important that I only go to areas approved for our night experience to stay safe.

# Saying Goodbye

I will end the evening fun by saying goodbye to my new friends. We can always come back on another day to see any animals we didn't get to see at night.
